The CollinsCraft Roll Slitter

CollinsCraft Roll Slitter Model 76-24 with jib crane hoist and re-roller attachments pictured are offered as options.

In A Word...Precision

The answer to fast and precise roll slitting with absolutely no waste has eluded manufacturers and fabricators for years.

The solution is a **CollinsCraft Roll Slitter** custom built for your application. A CollinsCraft Roll Slitter provides precision cut widths in either a manually or Servo Auto-indexed system.

No other slitter is easier to use or cuts faster than a CollinsCraft.

CollinsCraft Slitters Make The Cut

Every **CollinsCraft Roll Slitter** is custom-made, to meet your needs. A CollinsCraft Roll Slitter can be built to accommodate rolls up to 240 inches in length and 48 inches in diameter.

Every **CollinsCraft Roll Slitter** is manufactured for safety. Each machine is equipped with manual blade guards.

*Everyday CollinsCraft Roll Slitters cut...
Non-woven, Woven, Geotextiles, Garment, Home Furnishings, Leather, Ceramic,
Rubber, Fiberglass, Carpet, even Ballistics Grade Woven Kevlar™.*

Every cut is neat, clean and to the exact measurement. Blade life is lengthened because it stops short of the non-rotating mandrel.

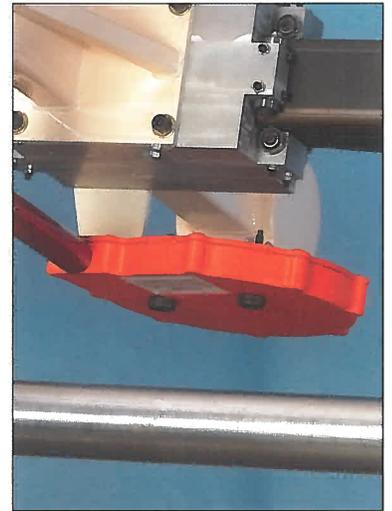

Adjustable roll speed and stationary blade prevent friction heat buildup.

Cut widths may be programmed in either metric or English measurements. Slitter controls are easy to use and within reach of the operator. The standard slitter is manually positioned to the cut width. Options include Auto-stop and Auto-index.

CollinsCraft designed Re-rollers are available as an option. This adds utility and flexibility to the slitter.

Every CollinsCraft Roll Slitter is supplied with two blade canisters. Roll rotation is reversible which extends the life of our proprietary blade. Empty canisters returned for refill are processed and shipped back the same day.

SPECIFICATIONS

MECHANICS

- Manual cut
- Size 76" x 24" to 240" x 48"
- Variable roll speed
- Slit width is manually positioned or computer-indexed

CUTTING

- Can cut full spectrum
- Blade canister contains 50 ft. of continuous blade
- Reversible rotation—utilizing both edges of blade

Here's A Guarantee...

CollinsCraft Roll Slitters are operating around the world. We're so certain that CollinsCraft Slitters will work for you that we'll buy it back during the first six months if your specifications aren't met. This applies only to our standard size machine!*
